

Mini symposium on **Physics and Geometry**

20 – 24 May 2019, Division of Theoretical Physics, RBI

Idea: A week of intensive discussions in small groups, aiming at advancing current open projects and defining future ones. There is no strict program, but we plan to have a number of overview blackboard talks in the Seminar room - one per day starting at 10 a.m. Anyone interested is welcome to join.

For more information contact Larisa Jonke or Thanasis Chatzistavrakidis.
