Aspects of noncommutative gravity

Prof. Kumar S. Gupta

Theory Group, Saha Institute of Nuclear Physics, Calcutta, India

Datum: ponedjeljak, 11. lipnja 2007.

Vrijeme : 15:00, c.t.

Mjesto: IRB, predavaona I krila

Abstract:

Starting with the history and motivation behind considering noncommutative space-time, this talk will cover how geometry is coded in terms of algebra, which admits a noncommutative generalization. The ideas of symmetries as applied to algebras, as well as the concept of twisted diffeomorphisms in the context of noncommutative gravity will be introduced. Simple examples will be discussed.
